b3dm *Batched 3D Model*

OGC is considering a proposed work item for 3D Tiles as a Community

The Batched 3D Models is an initial tile format proposed by **Open Geospatial Consortium (OGC®)** for **buildings**, terrain, massive models, etc. and the transfer of **3DTiles**.

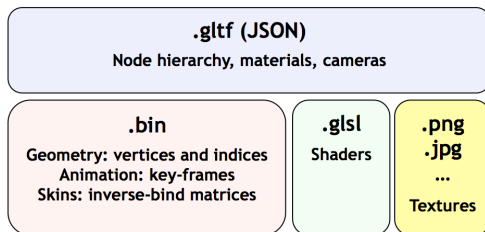

A tile is composed of two sections : a **header** immediately followed by a **body**, i.e. Binary glTF.

glTF *GL Transmission Format*

Used by 3DTiles

- ▶ Efficient, extensible, interoperable format (3D transmission and loading)
- ▶ Preserve full hierarchical scenes
- ▶ Making no assumptions about the target application or 3D engine.

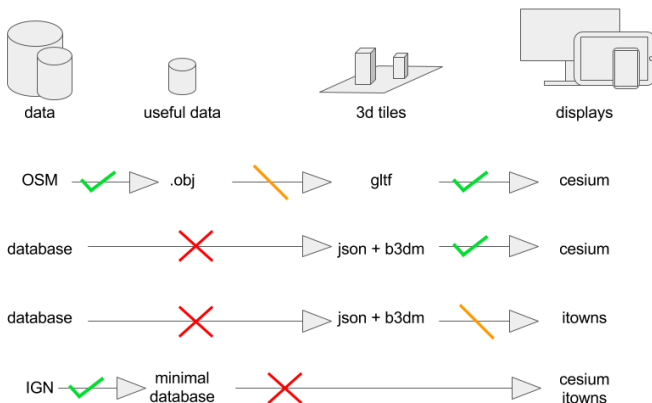

Personal report

- ▶ Rediscovery of **Cesium** & Node js
- ▶ Discovery of streams (WMTS) and **file transfers** (gltf, b3dm ...) + library js like OpenLayers
- ▶ Knowledge about **Markdown**
- ▶ Curious and Analytical mind
